

Twirling Parrot

Supplies: Paper and cardboard with outlines, googly eye, string, glue, scissors, punch.

Steps:

1. Cut out all the pieces.
2. Make two splits in the bird's body – one for the tail and another for the wings.
3. Hold the strips of the tail feathers together tightly and carefully pull them through the slit in the bird. Pull them halfway through and then bend the feathers down to create the tail feathers. Do this step again for the wings of the bird.
4. Glue the beak onto the parrot. Then add the googly eye.
5. Finish your twirling parrot craft by tying on the piece of string. Now your parrot is ready to twirl!
